SECTION A

GENERAL INFORMATION TO OFFERORS

This solicitation is for a Long Term Indefinite Quantity Type Contract and is designed to facilitate the military customers' requirements. Thus, the packaging specifications, FOB requirements, Electronic Data Interchange (EDI) requirements, and desired delivery schedules are structured to meet the government's objectives.

COMPLETION OF SECTIONS L AND M OF THE SOLICITATION

Contractors are advised to review and address these particular sections of the Solicitation. These Sections relate to the "Best Value" source selection evaluation parameters required in this solicitation. **Offerors are strongly encouraged to provide the data identified in SECTION L to ensure that the Government has the appropriate information to assist in the evaluation of offers.**

NAME OF OFFEROR OR CONTRACTOR

SECTION D

NOTICE TO CONTRACTORS:

Effective October 1, 2001, European countries are restricting shipments of material in or on Non-Manufactured Wood Packaging Material (NMWPM) (i.e., pallets, boxes, crates, etc.) that do not meet the following requirements adopted by the Commission of the European Communities (CEC): All wooden pallets and wood containers produced entirely or in part of non-manufactured softwood species shall be constructed from Heat Treated (HT to 56 degrees Centigrade for 30 minutes) coniferous material and certified accordingly by an accredited agency recognized by the American Lumber Standard Committee, Incorporated (ALSC) in accordance with Non-manufactured Wood Packing Policy and Non-manufactured Wood Packing Enforcement Regulations (see URL: <http://www.alsc.org>).

All contracts and orders where NMWPM may be used to ship material to U.S. forces and Foreign Military Sales customers in Europe are subject to these requirements. This includes all shipments moving through the Container Consolidation Points at the Defense Distribution Depots in Susquehanna, PA and San Joaquin, CA, the Container Freight Station in Norfolk, VA, Army Prepositioned Ship (APS 3) Upload Site in Charleston, SC (DODAAC: W81X89 and W81YUK), and the Marine Corps Blount Island Command in Jacksonville, FL 32226-3404, and the aerial ports of embarkation at Dover, DE; Travis Air Force Base, CA; Naval Air Station, Norfolk, VA; and Charleston Air Force Base, SC to the affected countries.

PALLETIZATION NO. DC1636P001, REV. E, DATED 03029

1. SCOPE.

This sheet covers the requirements for palletization of DSCC items of supply for handling, shipment, and storage.

2. REFERENCED DOCUMENTS.

The following documents, of the issue in effect on the date of solicitation, form a part of this palletization sheet to the extent specified herein:

STANDARDS (COMMERCIAL)

ASME-MH1 American Society of Mechanical Engineers (ASME) Pallets, Slip Sheets, and Other Bases For Unit Loads

STANDARDS (MILITARY)

MIL-HDBK-774 Palletized Unit Load (use as a reference only)

(Copies of listed federal and military specifications, standards, and associated documents listed in the Department of Defense Index of Specifications and Standards [DODISS] should be obtained from DoD Single Stock Point, Commanding Officer, Naval Publications and Forms Center, 5801 Tabor Ave., Philadelphia, PA 19120-5099. Also available on ASSIST at: <http://assist2.daps.dla.mil/quicksearch/>. The ASME-MH1 may be purchased at the ASME web site at: <http://store.asme.org/> [see "Pallets" link, then select MH1] or Phone: 1-800-843-2763 or 1-973-882-1167 or Fax: 1-973-882-1717.]

3. REQUIREMENTS.

Shipments of identical items packed in four or more shipping containers exceeding a total of 40 cubic feet per destination shall be palletized except when the shipping containers are required to be skidded (see 3C) or a quantity of four shipping containers per pallet exceeds the size or weight limitations for palletized loads (see 3A and 3B, as applicable). Shipments packaged in accordance with ASTM D3951 shall be palletized in accordance with 3A or 3B. Shipments packed Level A or Level B shall be blocked in accordance with 3B.

A. Material may be palletized on commercial pallets provided the load meets the following requirements:

- (1) The load does not exceed 52 inches in length or width, 54 inches in height, and 3000 pounds.

- (2) The load is prepared and secured in a manner that will ensure carrier acceptance and permit safe re-handling at destination.

B. Palletization shall comply with ASME-MH1. MIL-HDBK-774 and appendices will be used as a reference only.

- (1) Loads shall be stable and should not exceed the size and overseas limitations of MIL-HDBK-774.
- (2) Glued loads shall not be used.
- (3) For Level A packing, pallets shall comply with ASME-MH1, Part No. MH1/9-02SW4048. This part number shall be used for all shipments when the total weight is less than 1500 lbs evenly distributed.
- (4) For Level B packing, pallets shall comply with ASME-MH1, Part No. MH1/9-05SW4048. This part number shall be used for all shipments when the total weight is greater than 1500 lbs, but less than 3000 lbs evenly distributed.
- (5) Residual quantities of less than the quantity required for one course of the load need not be palletized.

C. Palletization is not required for shipping containers that are constructed constructed on skids. Shipping containers, except drums, exceeding 70 pounds gross weight or 40 inches in length, shall be constructed with skids. Skids shall be a minimum of 3 x 4 inch (nominal) lumber and shall be securely attached to permit multiple re-handling at destination. Drums shall be palletized.

D. The following commercial heat treatment process has been approved by the American Lumber Standards Committee (ALSC) and is required for all NMWPM entering a European country: "All wooden pallets and wood containers produced of entirely or in part of non-manufactured softwood species shall be constructed from Heat Treated (HT to 56 degrees Centigrade for 30 minutes) coniferous material and certified by an accredited agency recognized by the American Lumber Standard Committee, Incorporated (ALSC) in accordance with Non-manufactured Wood Packing Policy and Non-manufactured Wood Packing Enforcement Regulations (see URL: www.alsc.org). All wooden pallets and containers produced entirely of non-manufactured hardwood species shall be identified by a permanent marking of "NC-US," 1.25 inches or greater in height, accompanied by the CAGE code of the pallet manufacturer and the month and year of the contract. On pallets, the marking shall be applied to the stringer or on diagonally opposite sides and ends of the palletized pallet and be contrasting and clearly visible. On containers, the marking shall be applied on a side other than the top or bottom, contrasting and clearly visible. Failure to comply with all the requirements of this restriction may result in refusal, destruction, or treatment of materials at the point of entry.

SECTION D**D11C03 52.211-9010 MILITARY SHIPPING LABEL (MSL) REQUIREMENTS - MIL-STD-129P (MAR 2004) DLAD**

(a) MIL-STD-129, Revision P, dated December 15, 2002, establishes the requirement for Contractors that ship packaged materiel to the Government to provide both linear and two-dimensional (2-D) bar coding on military shipping labels (MSLs) (but see exceptions in paragraph (d)). The new requirements apply to all shipments, which includes either depot (DLA-Direct) or DVD (Customer-Direct) shipments. Linear (Code 3 of 9 or Code 39) bar codes continue to be required on interior packages (unit and intermediate packages)

for the National Stock Number (NSN) and, when applicable, the serial number; and on shipping containers and palletized unit loads for the NSN, Contractor and Government Entity (CAGE) Code, contract number and, when applicable, the serial number.

The new requirements do not apply to delivery orders when the basic contract has not been modified to require MIL-STD-129P.

(b) The new MSL replaces former DD Form 1387 and is illustrated in Figures 2a and 2b of MIL-STD-129P. The MSL requires Code 3 of 9 or Code 39 linear bar codes for the Transportation Control Number (TCN), piece number and DoDAAC for the ultimate consignee or mark-for address. The 2-D bar code on the MSL must contain the document (requisition) number, NSN, Routing Identifier Code (RIC), Unit of Issue, Quantity, Condition Code, and Unit Price, which are ordinarily included on the DD Form 250 or the DD Form 1348-1A. MIL-STD-129P provides numerous illustrations of what must be bar-coded and the recommended placement of the bar code. When the contract omits any data element required to be bar-coded, the field should be zero-filled.

(c) MIL-STD-129P, sources for conforming labels, and related information are available on the DLA Packaging Web Site at URL: <http://www.dscclia.mil/offices/packaging/specstdslist.html#STDs>.

(d) This clause does not apply to -

(1) Subsistence items procured through full-line food distributors (prime vendors), 'market ready' type items such as fresh milk, ice cream, and other fresh dairy products, fresh bread and other fresh bakery products, and all fresh fruits and vegetables, shipped within the Continental United States (CONUS) to customers within CONUS;

(2) Any item for which ownership remains with the vendor until the item is placed in designated locations at the customer location prior to issuance to the customer. Government control begins upon placement of the item by the vendor into the designated location or issuance from the designated location by vendor personnel (i.e., the vendor is required to stock bins at the customer location and/or issue parts from a vendor controlled parts room); or

(3) Bulk purchases of petroleum, oil and lubricant products delivered by (1) pipeline; or (2) tank car, tanker and tank trailer for which the container has (i) a capacity greater than 450 L (119 gallons) as a receptacle for a liquid; (ii) a maximum net mass greater than 400 kg (882 pounds) and a capacity greater than 450 L (119 gallons) as a receptacle for a solid; or (iii) a water capacity greater than 454 kg (1000 pounds) as a receptacle for a gas.

If an Offeror indicates that an 'exact product' is being offered, the Offeror must meet one of the descriptions in subparagraphs (i)-(iv) below. (Any Offeror not meeting one of these descriptions is not considered to be offering 'exact product,' even though the item may be manufactured in accordance with the drawings and/or specifications of an approved source currently cited in the AID.)

(i) An approved source currently cited in the AID offering its corresponding part number as cited in the AID;

(ii) A dealer/distributor offering the product of an approved source that meets the description in subparagraph (i) above;

(iii) A manufacturer who (A) produces the offered item under the direction of an approved source currently cited in the AID; and (B) has authorization from that approved source to manufacture the item, identify it as that approved source's name and part number, and sell the item directly to the Government. If requested by the Contracting Officer, the Offeror/Contractor must provide documentation to demonstrate such authorization.

(iv) A dealer/distributor offering the product of a manufacturer that meets the description in subparagraph (iii) above. If requested by the Contracting Officer, the Offeror/Contractor must provide documentation that demonstrates such authorization.

(2) When the AID identifies the item being acquired as a critical safety item (CSI), offers of exact product will be evaluated in accordance with 52.211-9005.

(c) 'Alternate product.'

(1) The Offeror must indicate that an 'alternate product' is being offered if the Offeror is any one of the following:

(i) An Offeror who (A) manufactures the item for an approved source currently cited in the AID; and (B) does not have authorization from that approved source to manufacture the item, identify it as the approved source part number, and sell the item directly to the Government;

(ii) A dealer/distributor offering the product of a manufacturer that meets the description in subparagraph (i) above;

(iii) An Offeror of a previously reverse-engineered product that is not currently cited in the AID; or

(iv) Any other Offeror who does not meet the criteria in subparagraphs (b)(1), (d), or (e) of this provision.

(2) If an alternate product is offered, the Offeror shall furnish with its offer legible copies of all drawings, specifications, or other data necessary to clearly describe the characteristics and features of the alternate product being offered. Data submitted shall cover design, materials, performance, function, interchangeability, inspection and/or testing criteria, and other characteristics of the offered product. If the offered product is to be manufactured in accordance with data the Offeror has obtained from elsewhere within the Government, the Offeror shall either furnish the detailed data specified in this paragraph, or supply a description of the data package in its possession; i.e., basic data document and revision, the date the data was obtained and from whom (Government agency/activity). If the Offeror does not furnish the detailed data with its offer, the Contracting Officer will be unable to begin evaluation of the offered product until such time as the detailed data can be obtained from the Government agency/activity possessing the data. If the alternate product is a previously reverse-engineered product, the Offeror shall provide: traceability documentation to establish that the offered item represents the item specified in the AID (i.e., invoice from an approved source or submission of samples having markings of an approved source); number of samples that were examined; the process/logic used; raw data (measurements, lab reports, test results) used to prepare drawings or specifications for the offered item; any additional evidence that indicates the reverse-engineered item will function properly in the end item; and any evidence that life cycle/reliability considerations have been analyzed.

(3) In addition, the Offeror may be required to furnish data describing the 'exact product' cited in the AID. The data required from the Offeror depends on the level of technical data describing the exact product, if any, available to the Government. The possible levels of technical data the Government may have and the corresponding data submission requirements for Offerors are identified in subparagraphs (a)-(d) below. For the item(s) being acquired under this solicitation, the level of data in the Government's possession and the corresponding requirements for data submission are identified in the AID; or, if not specified in the AID, are as follows: [buyer insert (a), (b), (c), or (d), as applicable, if AID does not identify]. (If the level of data in the Government's possession and Offeror requirements for

data submission are not identified in either the AID or in this subparagraph (c)(3), then subparagraph (a) below applies.)

(a) No data: This Agency has no data available for evaluating the acceptability of alternate products offered. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish drawings and other data covering the design, materials, etc., of the exact product cited in the AID, sufficient to establish that the Offeror's product is equal to the product cited in the AID.

(b) Adequate proprietary (i.e., limited rights) data: This Agency possesses adequate drawings and/or specifications for the exact product as cited in the AID, but such data are proprietary (i.e., limited rights) and shall be used only for evaluation purposes. The Offeror must furnish the data required in subparagraph (c)(2) of this provision, but is not required to submit data on the exact product.

(c) Inadequate data: This Agency does not have adequate data available for evaluating the acceptability of alternate products offered. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish drawings and other data covering the design, materials, etc., of the exact product cited in the AID, sufficient to establish that the Offeror's product is equal to the product cited in the AID.

(d) Adequate catalog data: This is a commercial off the shelf item. Adequate catalog data are available at the contracting office to evaluate alternate offers. In addition to the data required in subparagraph (c)(2) of this provision, the Offeror must furnish with its offer a commercially-acceptable cross reference list; or legible copies of all drawings, specifications or other data necessary to clearly describe the characteristics and features of the alternate product being offered, sufficient to establish that the Offeror's product is equal to the product cited in the AID. The Offeror is not required to submit data on the exact product.

(3) Except for indefinite delivery purchase orders (IDPOs), if this solicitation is automated (i.e., if the solicitation number begins with SPE; or begins with SP0 and contains 'T' or 'U' in the ninth position of the procurement instrument identification number (PIIN)), the Contracting Officer will not evaluate offers of alternate product (which includes offers of previously reverse-engineered product) for the current procurement. Instead, the Offeror shall submit a request to the location below for evaluation of the alternate product's technical acceptability for future procurements of the same item. The request for evaluation shall cite the National Stock Number (NSN) of the exact product and, as identified in this provision, include the applicable level of technical data on the alternate and exact products. All offers of alternate product will be handled in accordance with DLAD 17.7501(b)(4).

(d) 'Superceding part number.'

(1) The Offeror must indicate that a 'superceding part number' is being offered if the offered item otherwise qualifies as an 'exact product,' except that the part number cited in the AID has been superceded. The Offeror may be requested to furnish data, or provide confirmation through some other means, sufficient to establish that there are no changes in the configuration of the part. However, if such data are unavailable, the Offeror may be required to furnish technical data as required in paragraph (c) for 'alternate products.' (If such data indicate there have been changes in the configuration of the part, the offered item must be identified as an 'alternate product.')

Therefore, in order to ensure that adequate data is available for evaluation, Offerors may elect to furnish with their offer the information requested by subparagraph (b) or (c) of this provision, whichever is applicable for the offered product. Offerors are advised that if the additional data is not furnished, the Government may not be able to evaluate the offer. (For solicitation numbers beginning with SPE, the information should be mailed to the buyer at the procuring activity address on the solicitation. Uploading the information with the quotation, or including it in the 'Remarks' section, will make the offer a 'bid with exception,' causing it not to be evaluated.)</p> <p>(f) For all types of offers ('exact product,' 'alternate product,' 'superceding part number,' or 'previously-approved product'), Offerors shall provide the Contractor and Government Entity (CAGE) Code of the manufacturer and the part number being offered for each item in the solicitation.</p> <p>(g) Failure to furnish adequate data and/or information as prescribed in subparagraph (b), (c), (d) or (e) of this provision (when required for the current procurement) within 10 business days or less, or as otherwise required by the Contracting Officer or elsewhere in this solicitation, may preclude consideration of the offer. For automated procurements, it is the responsibility of the Offeror when offering a 'superceding part number' or a 'previously-approved part number' to ensure that supporting documentation arrives at the contracting activity within 2 business days after the data is requested, or the offer may not be considered. The Agency will make every effort to determine, prior to award, the acceptability of the products offered which meet the dollar savings threshold shown below, and/or which have a reasonable chance to receive an award based on price offered. Generally, the Agency will not evaluate alternate offers not meeting the dollar threshold. The savings potential is based on the cost of evaluation (\$200.00 if only a local technical evaluation is involved, plus an additional \$1,200.00 for each required Engineering Support Activity evaluation). If the Agency determines that an evaluation cannot be completed before the expected contract award date due to urgent requirements for the item, alternate offers will not be considered for the current procurement. Instead, they will be evaluated for technical acceptability for future procurements of the same item, if adequate data is submitted and savings potentials are expected, as stipulated above. For alternate offers not evaluated, the Offeror's complete technical data package will be returned.</p> <p>(h) If Offerors desire to restrict the Government's use of data submitted for evaluation, the data must bear the appropriate legends as prescribed by FAR 52.215 1(e). DELIVERY TYPE SOLICITATION (MAY 2003) DSCC

Subject to the terms and conditions of the solicitation relating to the evaluation of offers, the following procedure will be followed:

(a) When offers are requested on an ordering range basis, each CLIN will be evaluated as to price by:
[] applying a weighted factor of 18% to the first ordering range, 36% to the second ordering range, and 46% to the third ordering range to arrive at an average weighted unit price.
[X] applying a weighted factor of 5% to the first ordering range, 65% to the second ordering range, 25% to the third ordering range, and 5% to the fourth ordering range to arrive at an average weighted unit price.

SECTION L

INSTRUCTIONS TO OFFERORS

Proposals will be evaluated in terms of both price and other evaluation factors in accordance with the evaluation criteria contained in this solicitation. Offerors should thoroughly read and understand the terms and conditions contained in the solicitation. Failure to provide any information requested in the solicitation, may render the offeror's proposal technically unacceptable and preclude it from any further consideration for contract award. Offerors should ensure that the information contained in their proposal is factual, accurate and complete. If the Government accepts the offer, it will contractually bind the successful offeror to the terms and conditions of the solicitations.

In addition to price, the Government will evaluate other business/technical factors in accordance with the evaluation criteria contained in the solicitation. These factors are deemed essential in order to determine the offer that best meets the Government's needs.

1. PRICE

Offerors shall submit a pricing proposal for the item(s) identified in the RFP's supplies or services with the offeror's insertions of its proposed prices for each contract line item on which the offeror is making a proposal.

2. PAST PERFORMANCE**Automated Best Value System (ABVS)**

Each offeror will be assigned an ABVS score based upon its past performance.

Past Performance:

Past Performance information is maintained for performance under all procurements with the Defense Logistics Agency (DLA). ** Overall performance is evaluated as is performance in each Federal supply Class (FSC). This information is used to generate ABVS ratings which are based on the following indicators:

Delivery Delinquencies

- Number
- Severity
- Contractor Caused Terminations, Cancellations, and Withdrawals

For administrative purposes, the delivery rating period excludes the most recent 60 days. For ABVS purposes, delinquent lines represent shipments not shipped and/or received in their entirety by the Contract Delivery Date (CDD).

Quality Complaints

- Product Nonconformance/Laboratory Test Failures
- Packaging Nonconformances

For administrative purposes, the quality rating period excludes the most recent 30 days.

** The Defense Logistics Agency is developing and installing a new suite of commercial business software we call Business Systems Modernization (BSM). BSM will replace the old material management systems with the best of today's business applications. The first phase of BSM that will affect both DLA and our business partners is called the Concept Demonstration. This Concept Demonstration will use actual BSM software, real time data and actual transactions such as solicitations and awards. But because of the new software being tested, certain processes will change during the test and one of the most important is the change in ABVS. The collection of past performance information for certain NSNs in ABVS has been changed by the new software and will be affected by this Concept Demonstration beginning in July 2002.

Beginning in August 2002, ABVS will not collect performance information on NSNs that are included in this BSM test. The performance data for quality and delivery performance from new contract awards for these NSNs will not be used in the calculation of FSC scores. The contract line items will also not be included in the total number of contract line items on which the FSC score is based. Subsequently, the DLA score, which is a compilation of the FSC scores, will not include performance data from new awards on these NSNs. For NSNs which are not in the BSM test, ABVS will continue to work as it does today.

SECTION L

A BSM Release One Inquiry Menu has been created which allows vendors to determine if a particular FSC or NSN is included in the initial release at https://www.webflis.dlis.dla.mil/WEBFLIS/ASPscripts/Public_BSM.asp. Awards that will not be included in the ABVS performance data can be identified by contract numbers beginning with SPMXXX or SPEXXX, in lieu of SPOXXX. All current DLA Long Term Contracts (LTCs) with NSNs in the BSM test will be modified changing the contract number to SPMXXX. Delivery orders issued against non-DLA Basic Ordering Agreements (BOAs) and LTCs will have delivery order numbers starting with YM.

This change also means that your ABVS score in BSM will be your DLA score only; the FSC score will not be visible. This initial release will provide an opportunity for DLA, our customers, and our suppliers to use the new technology and processes to improve our supply chain effectiveness. Further information is found at the "BSM Supplier Information Resource Center" and the link is <http://www.dla.mil/j-6/bsm/sirc/>.

NOTE : The above 60 and 30 day offset periods are NOT grace periods.

ABVS rating does not determine an offeror's award eligibility, or technical acceptability, nor does it constitute a responsibility or non-responsibility determination.

By accessing the DSCC Internet Bid Board System (DIBBS), (<http://dibbs.dsccols.com/>), each offeror will be provided the opportunity to review their ABVS scores and negative historical performance data. For any questions or challenges to negative performance data, please forward requests/challenges to an ABVS Administrator at the below cited address, or telephone/fax an Administrator at one of the provided numbers:

Mail request to:
Defense Supply Center, Columbus
ATTN: DSCC-PAMB
P.O. Box 3990
Columbus, OH 43216-5010

Telephone Numbers:
(614) 692-1381
(614) 692-3383
Facsimile (FAX) Number: (614) 692-4170

When a discrepancy between contractor data and Government data occurs, the Government will make every effort to resolve the discrepancy expeditiously. However, the Government may make an award decision despite the existence of an unresolved challenge. The Government is the final authority for resolution of disputed data and its use in the source selection process.

Other Past Performance Information:

The offeror may provide past performance information, as follows, for consideration along with the offeror's ABVS score, in evaluating past performance:

- (a) A list of contracts, commercial or government, performed within the past two years, limited to three (3) government and three (3) commercial contracts for the same or similar items. The offeror shall provide or include a point of contact (POC), address, telephone number, an average dollar amount of the contract per annum, the period of performance, and a sample listing of the items provided for under the commercial contracts. For any government contracts, provide the government agency, a (POC), telephone number, appropriate contract number, estimated dollar value of the contract, period of performance, and a sample listing of the items provided. The Government reserves the right to limit the number of references it decides to contact.
- (b) A listing of any "problems" or discrepancies (includes shortages, overages, damages, defects, or misshipments, etc.) experienced within the past year for the contracts or customers reported in reference to paragraph 1a. Include a brief description of how these problems were addressed and remedied.

The offeror shall describe the extent of its past performance in subcontracting with small, small disadvantaged, women-owned small business concerns, and JWOD entities, in the past two years for the contracts reported in response to paragraph 1 above. The offeror shall also describe the extent of its past participation in the DLA Mentoring Business Agreements Program.

3. DELIVERY

See Section F of the solicitation for time, place and method of delivery or performance.

SECTION M

EVALUATION FACTOR FOR AWARD**General Basis for Award:**

() **Multiple Awards:** The Government intends to make an award to the offeror that represents the best value to the Government. Additional awards may be made to offeror(s) representing the next best value(s). Award(s) will be made in the combination that will assure the Government needs in terms of delivery, quality, and price will be met during the life of the contract(s). However, the government will award no more than ____ contracts per NSN or CLIN groups as a result of the solicitation.

(X) **Single Awards:** The award of each item of supply specified in this solicitation will be made to the responsible offeror whose offeror conforms with the solicitation and is most advantageous to the Government. In making the best value determination, the Government will make a comparative assessment of the offerors.

All proposals will be evaluated to determine that the offered price(s) reflects a technical understanding of the requirement and those considered unrealistic may be rejected.

Evaluation Factors:

The Government will base the determination of best value on a comparative assessment of the offeror's prices, past performance, and other evaluation factors as identified in this solicitation. The determination of best value also considers the relative importance of the evaluation factors. All evaluation factors when combined are:

(X) approximately equal to price; or

() significantly less important than price. As the evaluated price becomes more equal, relative importance of all other evaluation factors become more significant.

() significantly more important than price. As other evaluation factors become more equal, the evaluated price becomes more important.

The final award decision may be made through a trade-off between price and the non-price factors.

The following factors, ranked in descending order of importance, will be considered in the evaluation of proposals received under this solicitation:

1. Price
2. Past Performance
3. Proposed Delivery

1. PRICE:

The offered price will be evaluated as adjusted by price related evaluation factors identified in this solicitation together with the follo

() **M15D04** – Weighted Average Price Evaluation Method (DSCC 52.215-9C19) (SEP 2000)

(X) **M16D01** – Evaluation of Offers for Indefinite Delivery Type Solicitations (DSCC 52.216-9C07) (MAY 2003)

() **Other**

The Government will also evaluate the reasonableness of offered prices.

2. PAST PERFORMANCE EVALUATION FACTORS:

SECTION M

Past performance includes but is not limited to, the offeror's record of conforming to specifications, to the standards of good workmanship, adherence to contract schedules, commitment to customer satisfaction, and cooperative behavior. The Government will use the past performance evaluation factors marked below:

(X) Automated Best Value System (ABVS) (as defined below)

ABVS

The government will consider the offeror's ABVS score** and any other information provided relating to the offeror's performance (see Section L). The Government will review and evaluate the offerors reputation for conforming to specifications, to the standards of good workmanship, adherence to contract schedules, commitment to customer satisfaction, and cooperative behavior.

The Government may solicit information from an offeror's customers and business associates; federal, state, and local government agencies; and from other persons and organizations as deemed necessary. The Government reserves the right to limit the number of references it decides to query and to contact references other than those provided by the offeror.

An offeror's ABVS rating is an indicator of performance risk and will be evaluated first on the basis of past performance in the same Federal Supply Class (FSC) as the supplies being solicited. The Contracting Officer may consider the volume of business on which the performance score is based as a measure of confidence in the FSC score. A vendor's overall score may also be evaluated when a satisfactory measure of confidence cannot be obtained from the FSC score or if a vendor has no FSC score. The Contracting Officer may also take into consideration any other available and relevant past performance data. An offeror with no performance history in any FSC procured by DLA will be identified as a new offeror and will not be scored by the ABVS on performance. However, any other available and relevant past performance data may be considered in rendering an award decision. Regardless, the status of being a new offeror will not be grounds for disqualification for an award. New offerors may be considered more favorably than scored offerors with a poor performance record. Also, the desirability of expanding the supplier base and possible competition enhancement in future procurements will be considered in the source selection decision when new offerors are present.

** The Defense Logistics Agency is developing and installing a new suite of commercial business software we call Business Systems Modernization (BSM). BSM will replace the old material management systems with the best of today's business applications. The first phase of BSM that will affect both DLA and our business partners is called the Concept Demonstration. This Concept Demonstration will use actual BSM software, real time data and actual transactions such as solicitations and awards. But because of the new software being tested, certain processes will change during the test and one of the most important is the change in ABVS. The collection of past performance information for certain NSNs in ABVS has been changed by the new software and will be affected by this Concept Demonstration beginning in July 2002.

**Beginning in August 2002, ABVS will not collect performance information on NSNs that are included in this BSM test. The performance data for quality and delivery performance from new contract awards for these NSNs will not be used in the calculation of FSC scores. The contract line items will also not be included in the total number of contract line items on which the FSC score is based. Subsequently, the DLA score, which is a compilation of the FSC scores, will not include performance data from new awards on these NSNs. For NSNs which are not in the BSM test, ABVS will continue to work as it does today.

A BSM Release One Inquiry Menu has been created which allows vendors to determine if a particular FSC or NSN is included in the initial release at https://www.webflis.dlis.dla.mil/WEBFLIS/ASPscripts/Public_BSM.asp. Awards that will not be included in the ABVS performance data can be identified by contract numbers beginning with SPMXXX or SPEXXX, in lieu of SPOXXX. All current DLA Long Term Contracts (LTCs) with NSNs in the BSM test will be modified changing the contract number to SPMXXX. Delivery orders issued against non-DLA Basic Ordering Agreements (BOAs) and LTCs will have delivery order numbers starting with YM.

This change also means that your ABVS score in BSM will be your DLA score only; the FSC score will not be visible. This initial release will provide an opportunity for DLA, our customers, and our suppliers to use the new technology and processes to improve our supply chain effectiveness. Further information is found at the BSM Supplier Information Center at <http://www.dla.mil/j-6/bsm/sirc/>. Performance on prior contracts in subcontracting with small, small disadvantaged, historically black colleges and universities, minority institutions and women-owned small concerns, including compliance with the requirements of FAR 52.219-8 - Utilization of Small Business Concerns, FAR 52.219-9 - Small Business Subcontracting Plan, and DFARS 252.219-7003 - Small, Small Disadvantaged and Women-Owned Small Business Subcontracting Plan (DoD Contracts), will be considered. Use of JWOD entities and MBA performance under previous contract will also be considered.

3. **PROPOSED DELIVERY**: Offerors will be evaluated based on their offered delivery as compared to the government's required delivery. Preference may be given for offered deliveries that are shorter than the required delivery.
